Front End Developer

Student

My passion for Web Development comes from my inner interest in Technology from when I was a teenager and I also love the English language which I started to study then. Now I had some opportunities to indeed in programming and development. I have done some little projects of web development by using various technologies learned and during that time until now I could find a new job as technical support for clients in Avanza S.A.

Skills

- HTML and CSS.
- Python (Learning).
- Easy adaptability to instructions.
